

Top tips for deaf-friendly swimming

Do

- ✓ Ask the child or young person how you should communicate with them.
- ✓ Make sure you have everyone's attention before speaking – try waving or stopping to get everyone's attention.
- ✓ Limit distractions! Move to a quieter part of the pool to explain things or brief children poolside when they can wear their hearing aids or cochlear implants.
- ✓ Speak clearly and naturally.
- ✓ Ensure the pool is well lit and any light is shining on your face (not behind you).
- ✓ Stand in one place and keep eye contact while talking (this might involve kneeling or sitting down).
- ✓ Use visual aids to help understanding – including directional lane boards, photos, pictures or video.
- ✓ Use gestures and demonstrations.
- ✓ Make the topic really clear and stick to the point.
- ✓ Ask the child or young person to repeat what you have said to check they have understood.
- ✓ Allow time for questions and clarification.

Don't

- ✗ Speak too slowly or shout! This will distort your lip patterns.
- ✗ Move around when you are talking – it will be very difficult to lipread.
- ✗ Cover up your mouth or talk with your whistle in your mouth.
- ✗ Give up. If stuck, try explaining in a different way, write it down or use pictures. Alternatively, get a competent swimmer to demonstrate for you.
