

Transform any Space into a Therapeutic Exercise Place

Multi-award winning therapeutic and rehabilitation exercise technology, creating personalised programs for people with musculoskeletal (MSK) conditions and long-term health conditions.

Validated artificial intelligence creates individual and group sessions in water and on land

Engage new customer groups (older adults, people with long-term health conditions, pregnant with aqua natal sessions). Good Boost works alongside existing GP referral programmes and creates a service offering for social prescribing referrals

Rehab Technology of the Year
